### REASONS FOR ALLOWANCE

1. Claims 1, 3-14, 16-18, and 20-22 are allowed over the prior art of record.
2. Claims 2, 15, and 19 have been canceled.
3. The following is an examiner's statement of reasons for allowance: The Applicants arguments filed on 9/14/2007 are persuasive. **The feature of independent claim 1** directed towards allowable subject matter is wherein the data driver includes: first and second sampling circuits for generating the data voltage; and an analog buffer for buffering the data voltage supplied from the first and second sampling circuits alternately for each horizontal period and applies the buffered data voltage to the data lines. **The feature of independent claim 14** directed towards allowable subject matter is wherein the step of generating and storing the data voltage includes: generating the data voltage corresponding to the current using a voltage from a supply voltage line in response to a sampling control signal using first and second sampling circuits alternately for each horizontal period; and storing the data voltage using first and second capacitors. **The feature of independent claim 18** directed towards allowable subject matter is wherein the step of providing the data driver includes: providing first and second sampling circuits for generating the data voltage; and providing an analog buffer for alternately buffering the data voltage supplied from the first and second sampling circuits at each horizontal period to apply the buffered data voltage to the data lines. **Bae et al. generally teaches of a driving IC of an active matrix electroluminescence device, however, fails to teach of the limitations as outlined above. Therefore** the above said features in combination with the other limitations of the above independent claims 1, 14, and 18, are found to be allowable over the prior art of record, and therefore claims 1, 3-14, 16-18, and 20-22 are allowable.
